By signing this contract you agree to have read and understood the following:

- I possess a valid credit card EURO CARD, MASTERCARD or VISA.
- I have a digital satellite system capable of receiving signals from ASTRA 2 on 28.2°.
- If you do not yet have such a satellite system you have already made sure that such a system may be installed at your premises (maybe prior consent from your landlord or others is vital) and thus will have such a system up and running shortly.
- I am aware that the Sky digibox does not support DiSeq (DiSeq is used to switch between different LNB's)
- I understand that I will receive the sky digibox activated, only after the transfer of the complete amount has been made.
- I understand that we have no responsibility in case that sky removes a program from its listings, or change its beam strength, or a malfunction in the satellite occurs, or if sky decides to stop accepting non UK credit cards.
- I understand that my viewing will go on, as long as I pay my subscription through my credit card.
- I understand that I should not call sky revealing my viewing card number .If that happens I will be charged with the cost of a new card.
- I understand that I cannot ask for a temporary turn off. Permanent turn off can be requested after a minimum use of one year with one month notice. In this period there will be one more small charge from sky.
- I agree to the charge of the £130 per year from the UK Company NSAT which is for the services provided. The first charge will be 12 months after the activation date and every 12 months thereafter automatically, unless 1 month notice to cancel is given.
- There will be no charge for any request I have regarding my subscription, except adding Setanta & Asian programs later than the initial activation.
- All products & services which you order from us & BSKYB automatically bind you to the terms and conditions of this contract which are subject to change without notice.
